Advances in pyrolysis in combination with chromatographic and computer techniques 383

Subject Index

Agar
Initial application of desorption chemical ionization–pyrolysis–tandem mass spectrometry to structural analysis of carbohydrates 85

Agaricales
Characterization of *Agaricales* spores by pyrolysis–capillary gas chromatography and pyrolysis–gas chromatography–mass spectrometry 137

Agave americana
Scope and limitations of several pyrolysis methods in the structural elucidation of a macromolecular plant constituent in the leaf cuticle of *Agave americana* L. 29

Amber
Application of analytical pyrolysis to problems in art and archaeology: a review 393

Amylose
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode 55

Anhydro-oligosaccharides
Evidence for oligomers in pyrolysates of microcrystalline cellulose 71

Anhydrosugars
Initial application of desorption chemical ionization–pyrolysis–tandem mass spectrometry to structural analysis of carbohydrates 85

Aquatic humic acid
Analytical pyrolysis and environmental research 3

Archaeology
Application of analytical pyrolysis to problems in art and archaeology: a review 393

Art
Application of analytical pyrolysis to problems in art and archaeology: a review 393

Atmospheric dust
Development of a Curie-point thermal desorption system and its application to the analysis of atmospheric dusts 217

Benzoyl peroxide
Pyrolysis–gas chromatographic study of end groups in poly(methyl methacrylate) radically polymerized in toluene solution with benzoyl peroxide as initiator 167

Biomass
Evidence of lignin residues in humic acids isolated from vermicomposts 121

Biomass
Characterization by pyrolysis–gas chromatography of wheat straw fermented with white rot fungus *Stropharia rugosoannulata* 129

Biopolymers
Analytical pyrolysis and environmental research 3

Biopolymers, insoluble, non-hydrolyzable
Scope and limitations of several pyrolysis methods in the structural elucidation of a macromolecular plant constituent in the leaf cuticle of *Agave americana* L. 29

Boletus
Characterization of *Agaricales* spores by pyrolysis–capillary gas chromatography and pyrolysis–gas chromatography–mass spectrometry 137

Capillary columns
Development of a Curie-point thermal desorption system and its application to the analysis of atmospheric dusts 217

Caramel (colour)
Analysis of caramel colours. Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry and simulation of pyrolysis–mass spectrometry 159

Carbohydrates
Evidence for oligomers in pyrolysates of microcrystalline cellulose 71

Carbohydrates
Initial application of desorption chemical ionization–pyrolysis–tandem mass spectrometry to structural analysis of carbohydrates 85

CART
Pattern recognition studies of Curie-point pyrolysis–gas chromatographic data from materials important to agriculture 357

Catalysts, used hydrotreating
Characterization of carbon deposits on used hydrotreating catalysts by Curie-point pyrolysis 333

Cellulose
Analytical pyrolysis and environmental research 3

Cellulose
Evidence for oligomers in pyrolysates of microcrystalline cellulose 71

Cellulose
Interpreting isothermal thermogravimetric data of complex reactions: application to cel-

lulose pyrolysis at low temperatures 347
Chemical bonds
Photodegradation and photo-oxidation of synthetic polymers 237
Chemical ionisation
Evidence for oligomers in pyrolysates of microcrystalline cellulose 71
Chemometrics
Pattern recognition studies of Curie-point pyrolysis–gas chromatographic data from materials important to agriculture 357
Coal
Analytical Curie-point pyrolysis–gas chromatography as a tool to characterize key parameters relevant to coal reactivity 319
Coal
An approach to solid state kinetics 373
Coal char
A new apparatus to measure the reaction rates of wood and coal char in a high-pressure environment 307
Coke
Characterization of carbon deposits on used hydrotreating catalysts by Curie-point pyrolysis 333
Collision induced dissociation
Initial application of desorption chemical ionization–pyrolysis–tandem mass spectrometry to structural analysis of carbohydrates 85
Computer
Advances in pyrolysis in combination with chromatographic and computer techniques 383
Conservation
Application of analytical pyrolysis to problems in art and archaeology: a review 393
Copolymers
Thermal decomposition of polymeric silanes 175
Copolymers
Library of pyrolysis–gas chromatography data for synthetic polymers 209
Curie-point pyrolyser
Development of a Curie-point thermal desorption system and its application to the analysis of atmospheric dusts 217
Curie-point pyrolysis
Analysis of caramel colours. Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry and simulation of pyrolysis–mass spectrometry 159
Curie-point pyrolysis
Analytical Curie-point pyrolysis–gas chromatography as a tool to characterize key parameters relevant to coal reactivity 319
Curie-point pyrolysis
Characterization of carbon deposits on used hydrotreating catalysts by Curie-point pyrolysis 333
Curie-point pyrolysis
Pattern recognition studies of Curie-point pyrolysis–gas chromatographic data from materials important to agriculture 357
Cuticle
Scope and limitations of several pyrolysis methods in the structural elucidation of a macromolecular plant constituent in the leaf cuticle of *Agave americana* L. 29
Cutin
Analytical pyrolysis and environmental research 3
Cutin
Some mechanisms of flash pyrolysis of naturally occurring higher plant polyesters 289

Dammar
Application of analytical pyrolysis to problems in art and archaeology: a review 393
Degradation
Thermometric behavior of polyolefins 187
Deposits, carbon
Characterization of carbon deposits on used hydrotreating catalysts by Curie-point pyrolysis 333
Desorption chemical ionization
Initial application of desorption chemical ionization–pyrolysis–tandem mass spectrometry to structural analysis of carbohydrates 85
Dextran
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode 55
Dextran
Initial application of desorption chemical ionization–pyrolysis–tandem mass spectrometry to structural analysis of carbohydrates 85
Direct chemical ionization
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode 55

Electron structure
Photodegradation and photo-oxidation of synthetic polymers 237
End group
Pyrolysis–gas chromatographic study of end groups in poly(methyl methacrylate) radically polymerized in toluene solution with benzoyl peroxide as initiator 167

Field ionization
Pyrolysis–field ionization mass spectrometry of aliphatic polyesters and their thermal interactions in mixtures 197
Food colours
Analysis of caramel colours. Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry and simulation of pyrolysis–mass spectrometry 159
Forest damage
Analytical pyrolysis and environmental research 3
Fourier transform infrared spectroscopy
Pyrolysis of peat studied by thermogravimetry and Fourier transform infrared spectroscopy 297
Fungi
Characterization of *Agaricales* spores by pyrolysis–capillary gas chromatography and pyrolysis–gas chromatography–mass spectrometry 137
Fuzzy c-varieties pattern recognition
Pattern recognition studies of Curie-point pyrolysis–gas chromatographic data from materials important to agriculture 357

Gas analysis
Pyrolysis of peat studied by thermogravimetry and Fourier transform infrared spectroscopy 297
Gas chromatography
Scope and limitations of several pyrolysis methods in the structural elucidation of a macromolecular plant constituent in the leaf cuticle of *Agave americana* L. 29
Gas chromatography
Characterization of tobacco lignin preparations by Curie-point pyrolysis–mass spectrometry and Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry 97
Gas chromatography
Evidence of lignin residues in humic acids isolated from vermicomposts 121
Gas chromatography
Characterization by pyrolysis–gas chromatography of wheat straw fermented with white rot fungus *Stropharia rugosoannulata* 129
Gas chromatography
Characterization of *Agaricales* spores by pyrolysis–capillary gas chromatography and pyrolysis–gas chromatography–mass spectrometry 137
Gas chromatography
Analysis of caramel colours. Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry and simulation of pyrolysis–mass spectrometry 159
Gas chromatography
Pyrolysis–gas chromatographic study of end groups in poly(methyl methacrylate) radically polymerized in toluene solution with benzoyl peroxide as initiator 167
Gas chromatography
Thermal decomposition of polymeric silanes 175
Gas chromatography
Library of pyrolysis–gas chromatography data for synthetic polymers 209
Gas chromatography
Determination of styrene–butadiene and isoprene tire tread rubbers in piled particulate matter 227
Gas chromatography
Pyrolysis behaviour of a styrene–ethylene (styrene–hydrogenated butadiene) copolymer 261
Gas chromatography
Analytical Curie-point pyrolysis–gas chromatography as a tool to characterize key parameters relevant to coal reactivity 319
Gas chromatography
Pattern recognition studies of Curie-point pyrolysis–gas chromatographic data from materials important to agriculture 357
Gas chromatography
Application of analytical pyrolysis to problems in art and archaeology: a review 393
Glucan
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode 55
Graphitized carbon black
The pyrolysis of tetrethoxysilane over carbon and silica substrates 275
Groundwater
Analytical pyrolysis and environmental research 3

Hemicellulose
Analytical pyrolysis and environmental research 3
Hierarchical cluster analysis
Pattern recognition studies of Curie-point pyrolysis–gas chromatographic data from materials important to agriculture 357
Honey bees
Pattern recognition studies of Curie-point pyrolysis–gas chromatographic data from materials important to agriculture 357
Humic acids
Evidence of lignin residues in humic acids isolated from vermicomposts 121

Ink
Application of analytical pyrolysis to problems in art and archaeology: a review 393
Intermolecular reactions
Pyrolysis–field ionization mass spectrometry of aliphatic polyesters and their thermal interactions in mixtures 197
Isoprene
Determination of styrene–butadiene and isoprene tire tread rubbers in piled particulate matter 227

Kinetics
An approach to solid state kinetics 373
Kinetics, reaction
Interpreting isothermal thermogravimetric data of complex reactions: application to cellulose pyrolysis at low temperatures 347
Klason procedure
Characterization of tobacco lignin preparations by Curie-point pyrolysis–mass spectrometry and Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry 97

Lamina
Characterization of tobacco lignin preparations by Curie-point pyrolysis–mass spectrometry and Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry 97
Laminarin
Initial application of desorption chemical ionization–pyrolysis–tandem mass spectrometry to structural analysis of carbohydrates 85
Levoglucosan
Evidence for oligomers in pyrolysates of microcrystalline cellulose 71
Library
Library of pyrolysis–gas chromatography data for synthetic polymers 209
Lignin
Analytical pyrolysis and environmental research 3
Lignin
Characterization of tobacco lignin preparations by Curie-point pyrolysis–mass spectrometry and Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry 97
Lignin
Evidence of lignin residues in humic acids isolated from vermicomposts 121
Lignin
Characterization by pyrolysis–gas chromatography of wheat straw fermented with white rot fungus *Stropharia rugosoannulata* 129
Linseed oil
Application of analytical pyrolysis to problems in art and archaeology: a review 393
Litter
Analytical pyrolysis and environmental research 3

Mass spectrometry
Scope and limitations of several pyrolysis methods in the structural elucidation of a macromolecular plant constituent in the leaf cuticle of *Agave americana* L. 29
Mass spectrometry
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode 55
Mass spectrometry
Evidence for oligomers in pyrolysates of microcrystalline cellulose 71
Mass spectrometry
Characterization of tobacco lignin preparations by Curie-point pyrolysis–mass spectrometry and Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry 97
Mass spectrometry
Evidence of lignin residues in humic acids isolated from vermicomposts 121
Mass spectrometry
Characterization of *Agaricales* spores by pyrolysis–capillary gas chromatography and pyrolysis–gas chromatography–mass spectrometry 137
Mass spectrometry
Analysis of caramel colours. Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry and simulation of pyrolysis–mass spectrometry 159
Mass spectrometry
Thermal decomposition of polymeric silanes 175
Mass spectrometry
Pyrolysis–field ionization mass spectrometry of aliphatic polyesters and their thermal interactions in mixtures 197
Mass spectrometry
Pyrolysis behaviour of a styrene–ethylene (styrene–hydrogenated butadiene) copolymer 261
Mastic
Application of analytical pyrolysis to problems in art and archaeology: a review 393
Methodology
Analytical pyrolysis and environmental research 3

Micro-reactor
Advances in pyrolysis in combination with chromatographic and computer techniques 383
Midrib
Characterization of tobacco lignin preparations by Curie-point pyrolysis–mass spectrometry and Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry 97
Mixtures
Pyrolysis–field ionization mass spectrometry of aliphatic polyesters and their thermal interactions in mixtures 197
Moder
Analytical pyrolysis and environmental research 3
Moss
Analytical pyrolysis and environmental research 3

Natural resins
Application of analytical pyrolysis to problems in art and archaeology: a review 393
Negative ionization
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode 55
Nuclear magnetic resonance
Pyrolysis behaviour of a styrene–ethylene (styrene–hydrogenated butadiene) copolymer 261

On-line chromatography
Advances in pyrolysis in combination with chromatographic and computer techniques 383

Paper
Application of analytical pyrolysis to problems in art and archaeology: a review 393
Pattern recognition
Analytical pyrolysis and environmental research 3
Pattern recognition
Pattern recognition studies of Curie-point pyrolysis–gas chromatographic data from materials important to agriculture 357
Peat
Analytical pyrolysis and environmental research 3
Peat
Pyrolysis of peat studied by thermogravimetry and Fourier transform infrared spectroscopy 297
Penicillium italicum
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode 55
Photodegradation
Photodegradation and photo-oxidation of synthetic polymers 237
Photo-oxidation
Photodegradation and photo-oxidation of synthetic polymers 237
Poly(1-butene)
Thermometric behavior of polyolefins 187
Polyesters
Pyrolysis–field ionization mss spectrometry of aliphatic polyesters and their thermal interactions in mixtures 197
Polyesters, natural
Some mechanisms of flash pyrolysis of naturally occurring higher plant polyesters 289
Polyethylene
Thermometric behavior of polyolefins 187
Polymers
Pyrolysis–gas chromatographic study of end groups in poly(methyl methacrylate) radically polymerized in toluene solution with benzoyl peroxide as initiator 167
Polymers
Thermal decomposition of polymeric silanes 175
Polymers
Thermometric behavior of polyolefins 187
Polymers
Determination of styrene–butadiene and isoprene tire tread rubbers in piled particulate matter 227
Polymers
Evolution of the product yield with temperature and molecular weight in the pyrolysis of polystyrene 249
Polymers, synthetic
Library of pyrolysis–gas chromatography data for synthetic polymers 209
Polymers, synthetic
Photodegradation and photo-oxidation of synthetic polymers 237
Poly(methyl methacrylate)
Pyrolysis–gas chromatographic study of end groups in poly(methyl methacrylate) radically polymerized in toluene solution with benzoyl peroxide as initiator 167
Polysaccharides
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode 55
Polysaccharides
Initial application of desorption chemical ionization–pyrolysis–tandem mass spectrometry to structural analysis of carbohydrates 85

Polysilanes
Thermal decomposition of polymeric silanes 175
Polystyrene
Evolution of the product yield with temperature and molecular weight in the pyrolysis of polystyrene 249
Polystyrene
Pyrolysis behaviour of a styrene–ethylene (styrene–hydrogenated butadiene) copolymer 261
Polystyrene
An approach to solid state kinetics 373
Positive ionization
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode 55
Purge-and-trap sampling
Development of a Curie-point thermal desorption system and its application to the analysis of atmospheric dusts 217

Reaction mechanism
Thermometric behavior of polyolefins 187
Reaction mechanism
Photodegradation and photo-oxidation of synthetic polymers 237
Reaction mechanism
Evolution of the product yield with temperature and molecular weight in the pyrolysis of polystyrene 249
Reaction mechanism
Some mechanisms of flash pyrolysis of naturally occurring higher plant polyesters 289
Reaction rate
A new apparatus to measure the reaction rates of wood and coal char in a high-pressure environment 307
Rubber, isoprene
Determination of styrene–butadiene and isoprene tire tread rubbers in piled particulate matter 227
Rubber, styrene–butadiene
Determination of styrene–butadiene and isoprene tire tread rubbers in piled particulate matter 227

Sagebrush
Pattern recognition studies of Curie-point pyrolysis–gas chromatographic data from materials important to agriculture 357
Sequence length distribution
Pyrolysis behaviour of a styrene–ethylene (styrene–hydrogenated butadiene) copolymer 261
Silica, pyrogenic
The pyrolysis of tetrethoxysilane over carbon and silica substrates 275
Singlet oxygen
Photodegradation and photo-oxidation of synthetic polymers 237
Soil
Analytical pyrolysis and environmental research 3
Spore
Characterization of *Agaricales* spores by pyrolysis–capillary gas chromatography and pyrolysis–gas chromatography–mass spectrometry 137
Spruce needles
Analytical pyrolysis and environmental research 3
Spruce wax
Analytical pyrolysis and environmental research 3
Straw
Characterization by pyrolysis–gas chromatography of wheat straw fermented with white rot fungus *Stropharia rugosoannulata* 129
Styrene–butadiene
Determination of styrene–butadiene and isoprene tire tread rubbers in piled particulate matter 227

Tandem mass spectrometry
Pyrolysis–direct chemical ionization mass spectrometry of some biopolymers in the positive and negative ionization mode 55
Tandem mass spectrometry
Initial application of desorption chemical ionization–pyrolysis–tandem mass spectrometry to structural analysis of carbohydrates 85
Temperature-programmed in-source pyrolysis
Analytical pyrolysis and environmental research 3
Tetraethoxysilane
The pyrolysis of tetrethoxysilane over carbon and silica substrates 275
Thermal degradation
Pyrolysis behaviour of a styrene–ethylene (styrene–hydrogenated butadiene) copolymer 261
Thermal desorption system
Development of a Curie-point thermal desorption system and its application to the analysis of atmospheric dusts 217
Thermobalance
A new apparatus to measure the reaction rates of wood and coal char in a high-pressure environment 307
Thermogravimetric analysis
Pyrolysis of peat studied by thermogravimetry and Fourier transform infrared spectroscopy 297

Thermogravimetric analysis
Interpreting isothermal thermogravimetric data of complex reactions: application to cellulose pyrolysis at low temperatures 347
Time-resolved field ionization mass spectrometry
Analytical pyrolysis and environmental research 3
Tires
Determination of styrene–butadiene and isoprene tire tread rubbers in piled particulate matter 227
Tobacco
Characterization of tobacco lignin preparations by Curie-point pyrolysis–mass spectrometry and Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry 97
Vermicomposts
Evidence of lignin residues in humic acids isolated from vermicomposts 121
Willstätter procedure
Characterization of tobacco lignin preparations by Curie-point pyrolysis–mass spectrometry and Curie-point pyrolysis–high-resolution gas chromatography/mass spectrometry 97
Wood
A new apparatus to measure the reaction rates of wood and coal char in a high-pressure environment 307
